

PERFORMANCE PLANTS, INC.

PERMANENT RESEARCH POSITION

AVAILABLE IMMEDIATELY

A soybean breeder position is available in the Trait Assessment & Commercialization Program at Performance Plants Inc immediately.

The ideal candidate will lead the company's soybean breeding program in which desirable genetic traits are evaluated in both controlled growth environments and in the fields and introgressed into elite germplasms for further selection and commercialization. The qualified applicants should possess a B. Sc or M. Sc. in crop science, breeding or agronomy with experience in soybean breeding. Research background in plant stress and experience in regulatory approval of bio-engineered crops are an asset. In general, the candidates will ideally be detail-orientated, well-organized, enthusiastic and able to appreciate goal and team-based research and development.

Performance Plants Inc is an award-winning Canadian agricultural biotechnology company, whose mission is to discover, develop and commercialize innovative plant biotechnologies that improve crop performance and agricultural productivity to mitigate climate change for a sustainable agriculture. The Company is located in the beautiful city of Kingston, Ontario of Canada.

Interested applicants should send their curriculum vitae (including the names of three references) to:
